

Quietpod Talk

Telephone room on wheels, where you are when you need it.
With a QuietPod Talk just nearby your desk you avoid disturbing calls in open areas in addition to secure confidentiality.

Technical content (can be customized)

Mobility

All units have wheels installed for relocation within the floor.

Sound insulation

QP walls: Rw dB 40/45
QP roof: Rw dB 40
QP window / door : Rw dB 40

Ventilation

The roof has a built in fan that draws the air through channels in the floor or walls and out through an advanced sound trap system in the ceiling. Dimmers regulate the fan.

Light

Light panels with dimmers are installed in ceiling that gives 500 LUX

Power sockets

2 x Talk, 4 x Work, 4 x Conference

Data/telephone jacks

2 x Talk, 4 x Work, 4 x Conference

Detector

Light and fan are activated by a detector when users enter the pod.

Construction

QuietPod has developed a unique mobile room concept based on a modular frame work of aluminum profiles that allows flexibility for users. Together with heavy wall constructions with insulation we guarantee excellent sound insulation and absorption for users in open plan offices and public areas.

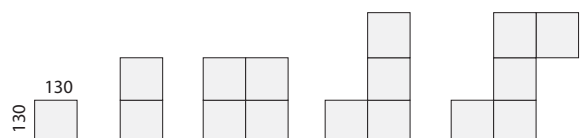

Connecting

Necessary for activating unit: 1 power insert and 1-3 RJ 45 inserts for Ethernet/telephone

Create your own QuietPod.

As architect and customer you may put together your own designed QuietPod. Choose between different materials and modules of glass, walls and doors together with your choice of furniture for your purpose.
